A preschooler's world opens up in new ways as children improve coordination, learn complex games, and begin to interact more with their peers. Our Christ-centered A Beka Book Curriculum introduces language, math, science and social skills in a logical, natural sequence to encourage learning one step at a time. Our teachers also provide individual attention to address your child's unique needs.

Our program provides a rich classroom environment where children are encouraged to explore and are challenged to learn, while making friends and developing self-confidence. They strengthen their cognitive skills with fun memory games in which they match objects that

share similar characteristics. And, because children learn best by doing, we provide opportunities for hands-on experiences, such as creating collages, which combines creative expression with a tactile experience.

- Math and science skills developed with hands-on experiences
- Thematic units that encourage curiosity, self-direction and confidence
- Daily language experiences that support literacy and language development
- Regular communication with teachers so that you are informed
- Weekly Chapel
- Bible Story-based Curriculum
